# DO YOU KNOW THESE FUN SUN FACTS?

What is the sun?

What does the sun give us?

What does the sun do at night?

The sun is a very big and hot star. It's so big that you could fit over a million Earths inside of it! The sun is important because it gives us light and heat. Without the sun, Earth would be very cold and dark.

During the day, the sun shines down on us and makes everything bright. But did you know that the sun is also important at night? The sun's light reflects off of the moon, which is why the moon can sometimes look very bright in the sky.

# RIDDLES

## RIDDLE 1

In the sky so high, I take my flight,  
Spreading warmth and shining bright.  
Daytime's friend, with a golden ray,  
I light up the world for fun and play.

Up above, I wear a glowing crown,  
Gentle warmth to the Earth I bring down.  
Morning to evening, I'm on the run,  
Guess me now, kids, I'm the...?

---

## RIDDLE 2

With fur so soft and tail that wags,  
I'm your buddy who never nags.  
I chase my tail and fetch that ball,  
Loyal and friendly, I'm loved by all.

Guarding homes with a bark so true,  
I come in sizes, big and small too.  
Take me for walks, I'll lead the way,  
Who am I, kids? Can you say?
